The poster has a bright yellow background. At the top left, there are blue vertical lines of varying heights. At the top center, there is a small flower with five petals in green, blue, yellow, red, and pink. At the top right, there are white dots of varying sizes and a red sun-like shape with yellow rays. On the right side, there is a blue circular shape with white lines radiating from it. At the bottom left, there is a large rainbow with red, orange, and blue bands. At the bottom center, there is a blue squiggly line. At the bottom right, there is a red and blue rainbow. The text 'SUMMER OF SENSES' is in a white box with a pink border, and 'FIZZING FRIDAYS' is in a red box with a white border.

SUMMER OF SENSES

FIZZING FRIDAYS

Scientastic Family Tours & Sensory Science Shows

11:00, 12:00, 13:00, 14:00 – Sign up at the Family Activity Station

Science of Light- A sensory science show exploring the magic of light. No need to pre-book. Sign up on the day at the Family Activity in the Welcome gallery. Suitable for all ages.

Sensational Archive!

10.00 to 15.00 – The Learning Hub

In the Archive, staff use a range of senses, not only sight to work with and understand the objects in the collections. These playful workshops provide the opportunity to touch, smell, listen to and even taste(!) the stuff archives are made of.

'Glass' Plate Image Making

10.00 to 15.30 – The Learning Hub

In our Archive we have lots of images and hold over a million different photographic negatives of different types! These images are carried on different materials such as plastics and glass plates. You will have the chance to take a look at the magical colours produced when testing for polyester negatives and find out how important it is to preserve these wonderful items. Why not also have a go at making your own plate negatives with this take-home activity. Before you go home, put it on the light box and admire your artwork!

The background is a vibrant yellow. At the top left, there are blue vertical lines of varying lengths. To the right of these are white dots of different sizes. Further right is a red sun-like shape with yellow rays. In the top center, there is a small flower with five petals in green, blue, yellow, red, and pink. On the right edge, there is a blue semi-circle with white lines radiating from it. At the bottom left, there is a large rainbow with red, orange, and blue bands. To its right, there are white vertical lines of varying heights. At the bottom center, there is a blue squiggly line. At the bottom right, there is another rainbow with red, orange, and blue bands.
